

TROPICAL SEA CUCUMBER (Sea Apple)

GROUP/PHYLUM: Echinoderm

COLOUR: Red – Blue

MOVEMENT: Tube Feet – also for holding onto rocks

TEXTURE: Soft – Squishy – Smooth

SHAPE: Sausage – Round – Oval

HOW IT EATS: It is a filter feeder
It has sticky branches out its mouth

DEFENCE: Bright red colour is a warning to other animals not to eat it, because it is poisonous

JOB: Filter water

They have two openings – one for food to go in – the other for waste to go out and for breathing!
