

Tropical Sea Cucumber

- GROUP/PHYLUM:** Echinoderm
- COLOR:** Red – Blue
- MOVEMENT:** Tube Feet – also for holding onto rocks
- TEXTURE** Soft – Squishy – Smooth
- SHAPE:** Sausage – Round – Oval
- HOW IT EATS:** Filter feeder (feeds by straining suspended matter and food particles from water). Sticky branch tentacle stretching out of the mouth are used for catching food that flows by
- WHAT IT EATS:** Plankton and decaying organic matter
- DEFENCE:** Bright red colour is a warning to other animals not to eat it, because it is poisonous
- JOB:** To filter water

This awesome creature has two openings - one for food to go in, the other for waste to go out and for breathing!
